- 15:30** Coffee Break
- 16:00** **The Role of XML for the EIB System**
Christoph Sahm, ISE GmbH
- 16:30** **Presentation of a selection of remarkable new Java - related EIB developments by Scientific Partners and EIBA members & licensees**
- 17:00** End

the workshop

iETS, the ETS for the Internet age, is a new software package with many interesting business opportunities for EIB manufacturers and installers. The workshop is the ideal place to find out more about the potential of iETS. Java-based technologies are considered very important in the EIB world. At the same time, the operating system Linux attracts a lot of attention. Many interesting research & development projects will leave the prototype stage this year. In order to discuss experiences and new ideas, the EIB Special Workshop on iETS Java, Jini and Linux will bring together people from industry as well as from academia.

Listen to presentations and hands-on demonstrations about

- Business opportunities with iETS
- Java API for EIB
- Jini gateways
- Linux drivers for EIB
- Web-based remote control and visualisation
- Use of XML in the EIB world
- EIB and palmtops
- Interfacing with WAP
- Standardising e-services with OSGi
- Fast backbone
